

AARON EVANS

Jacksonville, FL | (205) 808-8051 | evansaaron385@gmail.com | linkedin.com/in/aaron-evans-ale

PROFESSIONAL SUMMARY

GIS Analyst and Remote Sensing Professional with more than three years of hands-on GIS experience supporting operational planning, environmental management, field programs, and data-driven decision-making. Experienced in maintaining authoritative spatial datasets, performing spatial and raster analysis, developing repeatable ArcGIS Pro and ModelBuilder workflows, producing web and mobile GIS content, and completing detailed geospatial QA/QC. Brings additional graduate-level GIS and remote sensing research, relational database knowledge, technical documentation experience, and six years of emergency-response leadership.

CORE QUALIFICATIONS

ArcGIS Pro | ArcGIS Online | ArcGIS Field Maps | ModelBuilder | Web Maps & Mobile GIS | Spatial Databases & Geodatabases | Spatial Data Maintenance | GIS Data Governance | Metadata & Documentation | Map & Feature Services Concepts | SQL & PostgreSQL | Raster & Vector Analysis | LiDAR, DEM & Hillshade | Cartography | QA/QC & Data Validation | Workflow Automation | Technical Support & Training | Emergency Response | Environmental Management

PROFESSIONAL EXPERIENCE

Remote Sensing Forester (GIS and Spatial Analysis) | Rayonier — Wildlight, FL | 03/2024–04/2026

- Maintained, analyzed, classified, and quality-checked more than 7,647 miles of authoritative stream-network data using ArcGIS Pro, LiDAR-derived elevation products, aerial imagery, raster tools, and field knowledge to support operational planning, environmental management, and compliance decisions.
- Developed repeatable GIS workflows with ArcGIS Pro and ModelBuilder for stream delineation, drainage interpretation, attribute processing, environmental mapping, and operational planning, improving consistency and reproducibility.
- Performed spatial analysis using DEMs, hillshade, Raster Calculator, Extract by Attributes, stream ordering, imagery interpretation, and vector editing to identify and validate ephemeral, intermittent, and perennial waterways.
- Conducted detailed QA/QC, researched mapping discrepancies, corrected spatial and attribute errors, documented assumptions, and maintained reliable datasets for office and field users.
- Created cartographic products and shared GIS outputs with technical and nontechnical stakeholders; translated complex geospatial findings into clear maps, documentation, and operational recommendations.
- Supported BMP implementation, stormwater planning, and Section 404/401 reviews through watershed evaluation, geospatial analysis, data coordination, and collaboration with forestry and field teams.

CBRN NCO / Sergeant | Alabama Army National Guard — Foley, AL | 04/2020–04/2026

- Led and trained a 6-person emergency-response team in hazardous-materials operations, environmental safety, contamination control, incident readiness, and time-sensitive field response.
- Maintained accurate training, inspection, equipment, readiness, and compliance records while enforcing OSHA, HAZWOPER, PPE, hazard communication, and operational safety standards.
- Communicated technical procedures to diverse audiences, coordinated competing priorities, and supported emergency operations requiring accuracy, documentation, collaboration, and adaptability.

Technical Forester | Rayonier — Andalusia, AL | 12/2022–03/2024

- Collected, edited, reviewed, and maintained forestry and environmental field data using ArcGIS Field Maps and mobile GIS workflows to support inspections, planning, land management, and operational decision-making.
- Produced and shared maps, field layers, technical reports, compliance documentation, and operational summaries using ArcGIS Pro and ArcGIS Online for field and office stakeholders.
- Supported data refreshes and field-to-office workflows by validating collected information, resolving inconsistencies, and coordinating updates between mobile users and GIS datasets.
- Supported erosion and sediment control, BMP implementation, stormwater monitoring, and environmental reviews across active land-management operations.

Graduate Research Assistant | Auburn University — Auburn, AL | 08/2020–12/2022

- Conducted GIS and remote-sensing analysis of watershed dynamics, environmental conservation, and natural-resource management using spatial, tabular, and remotely sensed datasets.
- Prepared maps, figures, technical reports, and presentations that communicated analytical findings clearly to technical and nontechnical audiences.

EDUCATION

M.S., Natural Resource Management — Auburn University, 2022

B.S., Environmental Science — University of West Alabama, 2020

Graduate Certificate, Restoration Ecology — Auburn University

CERTIFICATIONS & TRAINING

DataCamp Associate Data Engineer (SQL) | Data Engineer in Python Coursework (In Progress) | Qualified Preparer of Stormwater Pollution Prevention Plans (QPSWPPP) | Qualified Compliance Inspector of Stormwater (QCIS) | 40-Hour HAZWOPER | OSHA 30-Hour General Industry | OSHA 10-Hour General Industry | FEMA ICS 100, 200, 700, 800

TECHNICAL SKILLS

GIS Platforms & Applications: ArcGIS Pro, ArcGIS Online, ArcGIS Field Maps, ModelBuilder, web maps, mobile GIS, geodatabases, spatial data editing, metadata, cartography, spatial analysis, raster and vector processing, LiDAR, DEMs, hillshade, watershed delineation, stream ordering, aerial imagery interpretation

Data, Automation & Support: SQL, PostgreSQL, Python coursework, data cleaning, data validation, QA/QC, structured and relational data, workflow documentation, technical reporting, troubleshooting, end-user communication, Microsoft Excel, Word, and PowerPoint

Relevant Esri Growth Areas: ArcGIS Enterprise Portal, ArcGIS Server service publishing, Survey123, Dashboards, Experience Builder, Arcade, enterprise geodatabases, CAD/BIM-to-GIS, and ArcGIS Indoors

Environmental & Operational: Environmental management, BMPs, stormwater compliance, erosion and sediment control, Section 404/401 support, HAZWOPER, OSHA, incident response, hazard communication, emergency preparedness
